**Outsider Art
Berlin 2007**

Friday, 23 March 2007
15:45 - 17:15 Poster Session 59

Penis: Cancer and reconstructive surgery

Chair: S.J. Hosseini, Tehran (IR)

Chair: D. Ralph, London (GB)

Evaluation of dynamic lymphoscintigraphy and sentinel lymph node biopsy for the detection of occult metastases in patients with penile squamous cell carcinoma

B.E. Hughes, London (GB)

A prospective analysis of the role of ultrasound combined with fine needle aspiration cytology in the initial evaluation of clinically impalpable inguinal nodes in patients with penile squamous cell carcinoma

B.E. Hughes, London (GB)

Advancing experience in dynamic sentinel node biopsy for penile carcinoma

J. Leijte, Amsterdam (NL)

The significance of single microscopic positive sentinel nodes in penile squamous cell carcinoma

Y. Smith, London (GB)

Is routinely histological processing and examination of lymph node specimen in penile carcinoma reliable?

C. Naumann, Kiel (DE)

Lymph node metastases in intermediate risk squamous cell carcinoma of the penis

C. Naumann, Kiel (DE)

Following EAU guidelines for inguinal Lymphadenectomy for penile carcinoma; does it reduce the numbers of negative dissections?

N. Sheikh, Sunderland (GB)

Supra-regional penile cancer service utilising an urgent fax response system, direct histopathology frozen section co-ordination and Teleconferenced Multidisciplinary (MDT) meetings

D. Summerton, Leicester (GB)

The feasibility of a study of adjuvant therapies in node positive penile carcinoma

Y. Smith, London (GB)

Survival of node positive patients with penile squamous cell carcinoma offered post-operative radio/chemotherapy, or observation from a single U.K. supranetwork

Y. Smith, London (GB)

Neo-adjuvant chemotherapy in advanced penile carcinoma

J. Leijte, Amsterdam (NL)

5-year survival of invasive penile carcinoma treated by penectomy and inguinal lymphadenectomy

J. Rigaud, Quebec (CA)

Recent trends in incidence and mortality of penile cancer in England

B. Ayres, Bristol (GB)

Long-term patients satisfaction after surgical correction for penile curvature

A. Paez Borda, Fuenlabrada (ES)

Geometrical principle (egydio procedure) in the surgical treatment of peyronie's disease – our experience

S. Perovic, Belgrade (RS)

Aims and objectives:

Poster viewing for 30 minutes. Presentations are 1 minute in length followed by 3 minutes of discussion.
